Dear PGandE Hiring Team,

I am thrilled to submit my executive application suite for the Principal Cloud Architect position. With over 13 years of executive tenure at Oracle and foundational systems engineering at Sun Microsystems, I bring deep technical authority in Oracle Cloud Infrastructure (OCI), Infrastructure as Code (IaC), Terraform, and Oracle Kubernetes Engine (OKE) automation.

My attached executive resume details my career accomplishments—from leading cloud migration strategies for enterprise clients to publishing industry-recognized technical guides and live labs. I look forward to discussing how my engineering leadership can drive success at PGandE.

Target Focus / Interview Context: Standard Enterprise Cloud Architecture Alignment

Best regards,
Mahamat Hissein Guiagoussou
