WEKA — Senior Sales Engineer

Role Overview

WEKA is architecting a new approach to the enterprise data stack built for the age of reasoning. NeuralMesh by WEKA sets the standard for agentic AI data infrastructure with a cloud and AI-native software solution that can be deployed anywhere. It transforms legacy data silos into data pipelines that dramatically increase GPU utilization and make AI model training and inference, machine learning, and other compute-intensive workloads run faster, work more efficiently, and consume less energy.

As a Senior Sales Engineer, you will partner with enterprise customers and technology partners to understand their technical and business requirements, helping them leverage the value and performance WEKA can provide to their business and applications.

Key Responsibilities

- **Customer Education:** Meet with customers and partners to educate them on the technical aspects of WEKA.
- **Evaluations & Architecture:** Assist with evaluations and system configurations.
- **Demos & Presentations:** Build and deliver technical product and architecture presentations and demos.
- **Customer Advocacy:** Become the advocate for WEKA customers and bring feedback back to the R&D and product management organizations.
- **Technical Advisor:** Act as a technical adviser to your customers, periodically reviewing their status and informing them on possible improvements.
- **Subject Matter Expertise:** Become an SME on WEKA and its ecosystem.
- **RFPs/RFIs:** Contribute or lead responses to Requests for Proposals (RFPs), RFQs, and RFIs.
- **Documentation:** Help create and maintenance Q&As, best practices, and other technical documentation.
- **Hands-On Execution:** This is a hands-on position requiring active system interaction and performance testing.

Requirements

- Familiarity with high-performance I/O workloads.
- Extensive filesystems background — Experience with **NFS, SMB**, and distributed parallel file systems.
- Strong Linux OS knowledge.
- Data center networking understanding.
- Experience with performance demonstrations and analysis.
- Experience running workloads in cloud hypervisors such as **AWS, Azure, OCI, or GCP**.
- Scripting abilities (considered an advantage).
- Prior experience working at a startup company (considered an advantage).

- Excellent verbal and written interpersonal skills.

The WEKA Way (Core Values)

- **We are Accountable:** We take full ownership, always—even when things don't go as planned. We lead with integrity, show up with responsibility, and hold ourselves and each other to the highest standards.
- **We are Brave:** We question the status quo, push boundaries, and take smart risks when needed. We welcome challenges and embrace debates as opportunities for growth.
- **We are Collaborative:** True collaboration is about lifting one another up to succeed collectively. We are team-oriented, communicate with empathy, and remain transparent about goals and results.
- **We are Customer Centric:** Our customers are at the heart of everything we do. We actively listen and prioritize their success so that when our customers win, we win.
