COVER LETTER: Cloud Infrastructure Engineer at PGandE

Dear PGandE Executive Hiring Team,

As an enterprise cloud architect and technical sales leader combining over 13 years of cloud architecture leadership at Oracle with an extensive background in distributed systems (R&D;) at Sun Microsystems, I was immediately drawn to your mission. Your foundational work in building robust enterprise infrastructure aligns perfectly with my background in scaling complex distributed systems, OCI tenancies, and automated infrastructure frameworks.

Throughout my executive tenure at Oracle, I have led strategic enterprise customer engagements, multi-cloud automation initiatives, and production-grade Kubernetes deployments. Bringing this proven technical authority to PGandE will ensure immediate operational excellence and accelerated cloud delivery.

I look forward to discussing how my experience can support your engineering goals.

Best regards,

Mahamat Hissein Guiagoussou
