[LinkedIn Profile](https://www.linkedin.com/in/mahamathisseinguiagoussou/) | Target Role: Principal Cloud & Infrastructure Architect (Consultant / Short-Term) at PGandE

EXECUTIVE SUMMARY

Master Principal Cloud Architect and Lead Resident Architect at Oracle with extensive enterprise tenure specializing in cloud infrastructure automation, multi-cloud enterprise solutions engineering, high-performance computing, and zero-trust security frameworks. Combines deep technical engineering expertise with strategic leadership and academic research. Tailored specifically for **PGandE** targeting the **Principal Cloud & Infrastructure Architect (Consultant / Short-Term)** role.

CORE COMPETENCIES & TECHNICAL EXPERTISE

• Cloud Infrastructure & Architecture:** Oracle Cloud Infrastructure (OCI), AWS, Azure, GCP, Tenancy Design, High-Performance Computing (HPC)

• Infrastructure as Code & Automation:** Terraform, OpenTofu, Ansible, Packer Golden Image Pipelines, CI/CD Security Pipelines

• Container Orchestration & Cloud-Native:** Oracle Container Engine for Kubernetes (OKE), Node Pool Optimization, Production Best Practices

• AI Infrastructure & MLOps:** GPU-Accelerated Computing, Enterprise AI Infrastructure Integration, AIOps Frameworks

• Technical Leadership & Executive Strategy:** Enterprise Client Engagements, Strategic Architecture Workshops, Thought Leadership & Technical Publications

PROFESSIONAL EXPERIENCE & ENTERPRISE LEADERSHIP

• Master Principal Cloud Architect & Lead Resident Architect** | Oracle (2020 – Present)

• Lead strategic enterprise customer engagements, large-scale cloud migrations (such as Paramount AWS-to-OCI migration strategy), and secure tenancy designs.

• Architect mission-critical cloud infrastructure, high-throughput secure data pipelines, and low-latency networking solutions for tier-1 enterprise clients.

• Publish technical documentation, tutorials, and automation frameworks on OKE cluster automation, network configurations, and production readiness.

• Multi-Cloud Solutions Automation & Security Practice Lead** | Oracle (2023 – Present)

• Spearhead enterprise automation frameworks, publishing standardized Terraform/OpenTofu security modules and hardened Packer golden image distribution pipelines.

• Drive cross-functional technical alignment and cloud engineering best practices across major client accounts.

• Foundational Systems & Infrastructure Engineering** | Sun Microsystems / Enterprise Systems (Foundational Experience)

• Engineered robust core operating systems, high-availability hardware integrations, and distributed enterprise server architectures.
