COVER LETTER: Senior Sales Engineer / Solutions Architect at WEKA

Dear WEKA Hiring Team,

As an enterprise cloud architect and technical sales leader combining over 13 years of cloud architecture leadership at Oracle with an extensive background in distributed systems (R&D;) including high-performance computing, I was immediately drawn to your mission. Your foundational work in building robust enterprise infrastructure aligns perfectly with my background in scaling complex distributed systems.

Throughout my career, I have specialized in bridging complex, data-intensive infrastructure challenges with high-performance execution. I bring hands-on expertise across distributed systems, Linux OS architecture, data center networking, and multi-cloud environments (AWS, Azure, OCI, GCP), complemented by heavy production mastery in Infrastructure as Code (IaC), Terraform, Ansible, and automation pipelines.

I am eager to bring my deep technical background in distributed systems, multi-cloud platforms, and enterprise architecture consulting to help WEKA accelerate its strategic technology initiatives.

Best regards,

Mahamat Hissein Guiagoussou

Master Principal Cloud Architect & Technical Sales Leader
